Lorena - this is the first I've seen this map and the excel index - how long have you had this? I'm in the middle of another LA BID rush project today and possibly tomorrow and can't review this map and parcel ID list nor incorporate them into the MDP/ER right now. To answer your question - no I don't have another numbering system - I was waiting to get this one from NBS and you. We may also need NBS to separate this into 7 or so separate PDF files - I don't think I can insert a 7 page PDF properly into a Word doc especially as massive a file as this is.

Rick - it may be a few days before I can insert these Map ID #'s into the MDP and ER.

Ed,

I was quick to send the map in but I just realized you may have another system going. Anyway, do you have the answer to Rick's question?

Will we be able to see IDs that are blank in the MDP?

Good morning,

Attached is the map book and corresponding spreadsheet to identify the parcels.

Please let me know if there is anything else you need.

Best regards,

The map book and table can be accessed and downloaded by clicking the below download link:

[DOWNLOAD LINK](#)

The map book displays a map ID for subject parcels on each page. In some cases, certain larger parcels included a large number of APNs

associated with the same piece of land. In those instances I labeled those APNs as a range, as you will see beginning on page 2 of the map book (example shown below).
